

Algebra 2, Period 9 – Work for March 16-27 – Dr. Sargent

Days 1-5

During the first week, we will be reviewing Quadratics. I have prepared a review sheet on ALEKS titled “Homework 1 – Quadratics Review.” If you are doing this online, please complete this review. If you are doing this with pencil and paper, I have included an alternative assignment titled, “Unit 4 Test Study Guide.” Please complete this as a review. I have included the answers so that you can check your work, but you will be cheating yourself of valuable practice if you simply turn to the answers. Please try and do the work yourself before looking at the answers. You will not need to return this to me.

Days 6-10

The Unit Test is online for you to complete. It will become active Monday, March 23, and remain open through Friday evening, March 27. You will have three attempts to complete the test. I suggest you use your first attempt as practice, and then take it for real on your second and/or third attempt. You will have 90 minutes to take the test each time. Do not leave the test once you begin or ALEKS will think you are finished. I am trusting you to do this honorably – that is, to do your own work without help from anyone else, and without going elsewhere on the internet.

If you are doing this with pencil and paper, I have included two copies of this test. The first one, labeled “Test #5,” includes the answers so you can check yourself. Use this one as a review. The actual test is labeled: Test #1. Do this one as your actual test and return it to me for grading. If you desire a retake, request an additional version of the test and I will send it to you.

ALEKS TOPICS – Please note that your regular assignment of 12 topics per week continues. The week of Spring Break, March 30-Apr 5, is a bonus week of topics.
