

Geometry, Period 5 – Work for March 16-27 – Dr. Sargent

Days 1-5 – Review of Similar Triangles

We are at the end of the unit on Similar Triangles, and were ready to begin a review of the unit. I have prepared a worksheet on ALEKS for you to use in reviewing this unit – it is entitled “Homework 1 – Similarity Review.” You should finish this to help you with reviewing the material in the chapter. For those doing this at home, I have included the answers so you can check your work. Please try and do the problems yourself first, before checking the answers, and use the answers to aid you in correcting your understanding of the problems. You do NOT need to return this work to me.

Days 6-10

I have prepared the Unit 6 test on ALEKS. You may do this up to three times, I suggest you use the first time to review, learning from your mistakes, and then try it a second or even a third time. You will have a maximum of three attempts, and each attempt is limited to 90 minutes. The test will be open Monday morning, March 23, through Friday evening, March 27. If you are doing this with pencil and paper, I have included two copies of the test. The first, marked #5, is for you to use as review, and will include the answers. The second, Labeled #1, will be the actual test. You will need to return this actual test to me for grading. If you wish to re-take it, please request an additional copy.

I am trusting you to do this test honorably – that is, do your own work with no help from the internet or from others.

ALEKS TOPICS – Please note that your regular assignment of 12 topics per week continues. The week of Spring Break, March 30-Apr 5, is a bonus week of topics.
