**Livegrades messaging and Aleks messaging**

During this time is it my goal to keep students learning without overwhelming them. For students with access to the internet and ALEKS, there will be weekly assignments followed by a quiz to be given the following Monday of each lesson. The lessons will be review of previously covered material and focus on one concept per homework assignment and quiz (except honors). If the current situation is extended new material will be introduced and test will be added to the evaluation criteria. Students should also continue to progress on the ALEKS pathway when the opportunity is available.

For each “homework” assignment students will have access to the assignment for a time period shown in the assignment, usually a week. Students will have access to unlimited attempts, example problems, explanations of problems that are incorrect (click the goggles), a calculator for problems it is allowed (upper right hand corner), and a messaging center to contact myself or other students with questions. Homework will be short as students will have work in other core classes but should be reviewed often in preparation for the weekly quiz. Students are encouraged to take notes on assignments use youtube or Kahn Academy or any other useful learning outlet. A grade will be given for all homework assigned.

Weekly quizzes will be assigned. Students will be given a 48-hour window in which to complete and submit the quiz. Students will not have access to examples or explanations, and only use a calculator when provided by ALEKS. Students are encouraged to use any written notes from homework, but should not use outside resources when completing the quiz.

In the event an assignment cannot be completed please contact me through one of the above contact methods.
