

Function Tables

A function table has inputs and outputs, and the numbers follow a rule. You can figure out the rule by setting up an equation using variables. Just be sure that your rule works for every set of inputs and outputs!

Key vocabulary

rule

Tells how one quantity is related to another.

function

In math, it is the relationship of two numbers in which one number depends on the other number.

equation

A mathematical statement in which one set of numbers or values is equal to another set of numbers or values.
