

Number Patterns

A pattern is a repeating arrangement of colors, shapes or figures. A number pattern is a repeating arrangement of numbers. The pattern is created because the numbers follow a rule: they are added, subtracted, multiplied or divided.

Key vocabulary

pattern

A repeating arrangement of colors, shapes, or figures.

rule

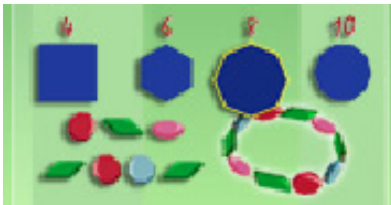

Tells how one quantity is related to another.

Function Tables

Got a really complex problem to solve? Some problems are best solved using a function table. We will show you how to set one up and find all the answers you need.

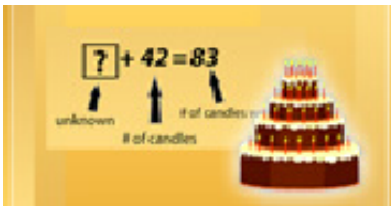

Geometric Patterns

Solving patterns is not always about numbers. Sometimes it is about shapes. And that can be tricky, but not if you know the right steps to the solution.

Multiples

Sometimes you have just got to divide. Whether you are baking a cake or sharing a pizza, multiples can make your math life easy.

Addition & Subtraction Equations

Have a problem, but not sure how to solve it? An equation can help.
